A Guide to Our Designers and Plans

Model : General Information about Plans

Manufacturer : -

Shown is a photo of the 1/4 Scale Sommer Monoplane, designed and built by John Radebaugh.

Also in Arizona Model Aircrafters product line are designs by award winning modelers such as John Cole, Gary Allen, John Tanzer, Fred Pierce and Tom Polapink.

In addition to these and other contributions from such as our friends like Bob Holman and Bob Banka, Arizona Model Aircrafters brings you the worlds largest selection of historical scale models.

Most kits and plans are offered in a variety of scales typically 1/12, through 1/3 sizes (other scales by special order) Kits include spun aluminum cowls, dummy engines, guns, wheels, interiors, and in most cases custom brass and aluminum hardware fittings.

It is our intention is to try to provide modelers a "one stop" shopping approach to scale kits including hard to find scale accessories. You need only to add your own preference type items such as screws & bolts, rigging cable and covering material.

With our reduced labor and production costs associated with the automated nature of our design and manufacturing processes, coupled with our ability of producing almost 100% of the required components "in-house", we can offer these deluxe custom cut models at pricing comparable to what others charge for their custom cut "short" kits alone.

Remember, if you run into a problem, technical support is just a phone call or E Mail away.
