Armament Set Spandau

Model : AS Spandau

Manufacturer : -

SPANDAU MACHINE GUN KIT

Add the finishing touch to your favorite warbird. These guns incorporate CNC cut brass, wood and aluminum construction like that found in our scale instrument kits. The guns include leather feed belts and feed chutes, laser cut parts and machined flash suppressor(s).

The kits also have illustrated assembly directions including pictures of actual gun placements. The guns are offered in 1/12 through 1/3 scale sizes with other scales by special order. The builder will need to supply a piece of aluminum tube or dowel rod paint and glue to complete.

Spandau gun kits are sold in pairs. Pricing shown is per pair.

Full scale 7/8 and 3/4 size gun kits or assembled replicas are available too. These large scale replicas can fire blanks (on left) or be gas operated. Large scale kits are specially made to suite your specifications. Call for details.
