Flyboys Zeppelin

Model : Flyboys Zeppelin

Manufacturer : Zeppelin

Flyboys Zeppelin

We provided several different plan sets for German fighting Zeppelins.

The original long range strategic bombers these massive airships were used by both sides during the war.

Arizona Model Aircrafters offers the plans as a free download.

[Zeppelin R Type Download](#)

Zeppelin files will download at 1/16"-1 ft scale. Printed copies are available for \$18 each plus postage. All plans are shipped rolled in a tube.

Additional plans and drawings are available in our reference section on the home page. Model kits of these WWI fighting machines plus later models including the famous LZ129 Hindenburg are available on a custom basis. These kits can be made to fly but expect to build a model at least 18 feet long. Constructed from laser cut balsa, cardboard, carbon fiber and tissue these models are offered by special order only. Smaller scale Z, N and HO scale kits make a unique accessory for your train layout.

Larger scale models can be made to fly as an indoor electric.

You definitely will not see this offered anywhere besides Arizona Model Aircrafters.

We can provide a wide range of balloon and blimp envelopes too.

Call 1-602-971-5646 or Email your inquiries to the office for additional information.

RC Blimps and Zeppelins are not recommended for outdoor use.
