## MQ Curtiss D Model Aiplane

Model : Curtiss Model D Push

Manufacturer : Curtiss

This beautiful 1/4 scale design of Glenn Curtiss' pre war Model D is definitely unique. The kit comes with a dummy OX-5 engine, laser cut wood and water jet brass fittings, turnbuckles, machined aluminum pulleys, Smithsonian scale documentation, and 3 wire spoke wheels.

The flight system design incorporates the radio and servos inside the pilot, yes that's right Glenn actually flies the model. Ground handling is a bit tricky since the gear doesn't steer but the design more than make up for this once it is in the air. This steady and stable flier brings everything to a stop at the field.

Setup and disassembly is quick and easy by removing the tail booms and a couple of cable connections.

Recommended for intermediate builders that want something completely different. Pilots figure optional.

### In The Airplane Model Kit

- Working Cable System
- OX 5 Engine Kit
- Laser Cut Parts
- Optional Pilot Kits

- Wire Spoked Wheels
- Scale Metal Hardware
- CNC Precision
- Scale Drawings
