Replica Vintage Engine Kit Green

Model : AZM 190

Manufacturer : Green

Green 4 Cylinder In Line

Vintage engine kits are available for scratch builders. These replicas, standard in our airplane kits, are available for purchase separately.

Offered in standard scale sizes of 1/3, 1/4, 1/6, and 1/12 these kits feature CNC machined and laser cut parts for the highest level of detail available to the modeler. Kit components are made from wood, acrylic, plastic, and metal (exact contents vary with scale).

Assembly information includes easy to follow detail drawings.

Green kits feature built up construction with machine turned or built up engine cylinders. The builder supplies hardware brass aluminum and copper tubing as necessary.

NEW 1/12 Scale Size for Electric Power

Ideal for small scale projects these new engine kits come with scale documentation like the larger scale versions and are designed for the instillation of electric drives inside the crankcase.

Shown in the graphic is a preliminary drawing of the Green for the new 1/4 scale AVRO Triplane.
